As you carry a tower of twenty filled pint glasses across a bar filled with fighting, smelly patrons you have an epiphany – you need to hire some help!

COMPONENTS

3 Employee Cards

SETUP

Shuffle the Employee cards into a facedown stack.

GAMEPLAY

BAR PHASE

Once you have at least 3 patrons in the Inn, you can afford to hire some help. After you have refilled the Bar, you may decide to hire an Employee. You may only hire one Employee per round.

To hire an Employee, flip the top card of the Employee stack face-up. Check the quirk ( ) of the Employee; it is combined with the quirks of the patrons at the Bar when checking if a single quirk appears 3 times or more.

INN PHASE

During the Inn Phase immediately following the hiring of an Employee, the Employee's special action on their card must be resolved when the next patron is placed in the Inn. After the special action is resolved, the Employee card is discarded.

WINNING THE GAME

There must be the required number of patrons in the Inn and all three Employees must have been hired to win the game. For an Employee to be considered 'hired' their special effect must have been resolved.

PLAYING WITH THE GUESTHOUSE EXPANSION

The Innployees only interact with the Inn. After an Employee is hired, you cannot place the next patron in the Guesthouse; they must be placed in the Inn.
